Solar-Log™ PM Package

Grid operators employ a wide range of signals that are required for feed-in management and that are used to send commands and the response signals. The Solar-Log™ PM Package is a single system to implement the various requirements with minimum effort. The PM Package consists of I/O Boxes and PM profiles. The I/O Boxes are a flexible gateway between remote control technology and the Solar-Log 1900 PM+, 2000 PM+ and Base. The input and output signals from the I/O Boxes are defined by the PM profile according to the grid operator requirement.

Technical data

Inputs	Up to 4 analog and up to 9 digital
Outputs	Up to 3 analog and up to 10 digital
Rated operating voltage	10 - 24 VDC
Article number	on request*

*The operator specific PM+ profile needs to be ordered.
