

#### **Power Meters**

### **Power and Energy Measurements**

Each PV plant has its own energy measurement requirements. Solar-Log™ offers different power meters from which it can be selected the one that best fits with the project.

The following power meters can be configured for different operating modes in the Solar-Log. This depends on the requested use for the meter. It is possible to record the production output (generator), the consumption (consumption meter or bi-directional meter) and the sub-consumption values such as the registration of battery charge or battery discharge levels.

Article number	255914	256324	255913	256059
Warranty			2 years	
Misc.	Illuminated display. display for active and reactive pow- er in 2 energy directions.Display: I, U, P, S, F, cos phi			
Measurement interval	-	-	-	-
LCD Display	(5 +1 digits >9999.99 kWh)	(6 +1 digits >99999.99 kWh)	>	(7 +1 digits 999999.99 kWh)
	4 + 2 Digits	5 + 2 Digits		6 + 2 Digits
Protection level			IP51	•
Wire diameter	≤ 25 mm², ≤ 2,5 mm² (Additional terminals)			
Dimensions (wxhx d) in mm	17,5 x 117 x 63	35,8 x 141,5 x 63	3 70 x 140 x 63	70 x 140 x 63
Self-consumption	≤ 2 W/phase - ≤ 10VA/phase			
Measuring range	20 mA - 45 A		20 mA - 100 A	6 mA - 6 A
Power frequency	50 Hz	50 Hz	50 Hz	50 Hz
Voltage supply		230 V AC	3 x 230/4	100V AC (-20% bis +20%)
Voltage measurement		230 V AC	3 x 230/4	400V AC (-20% bis +20%)
Number of phases	1	1	3	3
Current transformer connection	-	-	-	6 A x/1, x/5A (Transformer input)
Direct connection (measurement)	45 A	100 A	100 A	-

Solar-Log also offers universal power meters. These can be used as utility meters in addition to the above-mentioned operating modes - for example, for its use at the grid connection point (e.g. for EZA controllers according to VDE-4110 in Germany).

They can be integrated into both the low-voltage and the medium-voltage network (via transformers). In addition to voltage-controlled reactive power control Q(U), they are used for reactive power control at the feed-in point and for recording measured values for feedback to the grid operator. They are also suitable as consumption meters for large loads.

Utility Meter UMG 104

Utility Meter UMG 604 E-PRO & UMG 604 E-PRO (24V)

# We offer the following current transformers for the Solar-Log™ PRO380-CT meter

### Article number

Solar-Log™ PRO380-CT 500A Measuring transformer for conductor line 30 x 10 mm or compact round cable up to 26 mm Class 1, uncalibrated, secondary current 5A	256067
Solar-Log™ PRO380-CT 250A Measuring transformer for conductor line 30 x 10 mm or compact round cable up to 26 mm Class 1, uncalibrated, secondary current 5A	256068
Solar-Log™ PRO380-CT 100A Measuring transformer for conductor line 30 x 10 mm or compact round cable up to 26 mm Class 1, uncalibrated, secondary current 5A	256069
Solar-Log™ PRO380-CT 500A Cable split core current transformer Class 1, round cable up to 32 mm, uncalibrated, small size model, connecting cable 2.5 m included, secondary current 1A	256070
Solar-Log™ PRO380-CT 250A Cable split core current transformer Class 3, round cable up to 18 mm, uncalibrated, small size model, connecting cable 2.5 m included, secondary current 1A	256071
Solar-Log™ PRO380-CT 100A Cable split core current transformer Class 3, round cable up to 18 mm, uncalibrated, small size model, connecting cable 2.5 m included, secondary current 1A	256072
Solar-Log™ PRO380-CT 500A, Class 0.5, Measuring transformerfor conductor line 30 x 10 mm or compact round cable up to 26 mm, Declaration of Conformity, approval for billing, secondary current 5A	256073
Solar-Log™ PRO380-CT 250A, Class 0.5, Measuring transformer for conductor line 30 x 10 mm or compact round cable up to 26 mm, Declaration of Conformity, approval for billing, secondary current 5A	256074
Solar-Log™ PRO380-CT 100A, Class 0.5, Measuring transformer for conductor line 30 x 10 mm or compact round cable up to 26 mm, Declaration of Conformity, approval for billing, secondary current 5A	256075

Cable split core current transformer
