

Smart Energy with Solar-Log™

The Intelligent Energy Management System

Clever Control of Self-Produced Power

Various electrical appliances can be directly controlled by the Solar-Log Base. Additional options to control appliances include networked “smart plugs” and the internal relays of the Solar-Log Base and the Solar-Log™ Smart Relay Station V2.

Graph of the daily consumption from the connected appliances.

The Solar-Log™ menu structure provides an intuitive user interface. This new structure allows smart electrical appliances, such as an AC ELWA-E in combination with Smart Plugs, to be controlled and prioritized based on the amount of surplus power. Different energy profiles and components can be linked and checked based on the simulation.
